Functional Home Evaluations

Education & Training

Philosophy

Advanced Home Care® believes competency/performance evaluation and continuing education are ongoing processes designed to ensure excellent patient care. We accomplish this by identifying our employee's strengths in meeting the therapeutic needs of the patient.

Practice

All field employees are competency evaluated through both written and clinical tests. All aides are also required to maintain 12 hours of continuing education credits per year.

Competency/performance evaluations and continuing education are conducted in our training center located in Troy, MI. Our programs and training target the most current and leading edge topics.

Competency evaluations specific to clinical procedures are also performed, with the client's permission, in the client's home. All competency evaluations are done by a Registered Nurse to ensure that patient-centered objectives and goals are met.
